

SAT Student Performance & Benchmarks

JETNIPAT SARAWONGSUTH

*I work for an independent research organisation in **West Virginia** where SAT has recently become compulsory. I have been contacted by a school in that state to provide them with some advice and guidelines to help improve the SAT performance.*

SCENARIO

The school would like to...

- Know what **SAT performance** is in other States.
- Identify students who are thriving and require **greater challenges**.
- Identify students who require additional academic **support**.
- Ensure students are on track to being able to go to their **desired colleges**.
- Ensure students are on track to doing their **intended majors** at colleges.

Benchmark Indicators

College Board's benchmark is a tool that helps educators assess student progress toward college readiness from year to year. Students at different Grades will have different benchmarks and the benchmark differs for the ERW and Math section. It can be divided into three bands.

Green

On track for college readiness

Yellow

Close to being on track for college readiness; continue to strengthen skills

Red

Need to strengthen skills

RECOMMENDATIONS

RECOMMENDATIONS

- The sudden State requirement for high school students to SAT in West Virginia has resulted in a sharp decline in the SAT score. As schools in the state become more familiar with the exam, the should be less of a decline in the scores.
- Emphasis should be placed on *Mathematics* to ensure that students meet the benchmark.
- Schools should *adopt PSAT8/9, 10 and PSAT/NMSQT* for Grade 8-11 students as these Preliminary SAT exams will help students get ready for SAT to be taken in Grade 12.
- Using the provided *benchmarks* and guidelines advised will help ensure students stay on track to being ready for college.
